Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 - 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Yokoyama et al. (U. S. Patent No. 6,099,598). Yokoyama et al. discloses in figures 42 and 21 and column 50, lines 35-67, column 51, lines 1-67, and column 28, lines 5-67, an exposure apparatus 801a and an exposure controller 802a. The track apparatus and the wafer handling apparatus include elements 308 and 309 (see figure 21). The track apparatus interconnects processing modules 303-n to 307-n. The cluster controller is element 805, which has communication lines 807a and 807b for communicating output control information to other apparatus. It is noted that Applicant repeatedly uses the expression “at least one of” throughout the claims. A reference only needs to disclose one of the elements after the expression “**at least one of**” to read on the claim. Tables 10, 11, and 12 disclose processing times in the processing modules and transportation times between processing modules. With respect to claim 3, column 28, lines 40 and 41 and column 52, lines 46-53, disclose processing chamber 307-3 which performs baking. In addition, column 53, lines 10-20, disclose monitoring (measuring) parameters. Column 54 and figure 42 discloses memory 804a to 804e which include storing metrology information. With respect to claim 5,

column 54, lines 15 and 16 ,disclose measuring film thickness. It is also noted that there are many other embodiments, such as shown in figures 1 and 13. With respect to claims 8 and 11, column 41, lines 61-63, disclose placing the different elements in a housing.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The other patent documents are cited to show lithography transporting systems.
